- An unaltered stamped and signed version of the statutorily endorsed work plan, including any work plan specific conditions, as determined by Earth Resources Regulation / and as requested by referral authorities under section 77TD(3) of the Act.

Approval of the work plan is sought by making application to the Department following the issue of the planning permit. Please complete and return the applicant checklist for the approval of a work plan and the specified required information with the application.

After the work plan is approved, you will be advised of the remaining requirements for the grant of the extractive industry work authority.
