Tree Protection Management Plan Addendum – King David School, Sports Facility Project

Dear Moo,

Please find below response to Item 13 of the Department of Environment, Land, Water and Planning request for information regarding Tree 11-13 within the supplied TPMP.

13 (a), (b) and (e) have been discussed within the Civica ArborSafe Tree Protection Management Plan (TPMP), particularly the attached data sheet, dated 24 February 2022 (*202111-Fontic-King David Sch-TPMP-02595v2.pdf*).

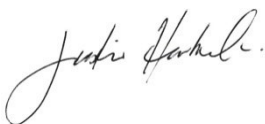

13 (c) *An assessment of the adequacy of the proposed setback of building and works from such vegetation*

As per section 5.5.32 of the TPMP "Trees 11–15 are unlikely to have their root systems impacted upon during resurfacing works given the grade change between public and private properties as well as the current non permeable surface within the school. The bulk of the tree roots are expected to be within the grassed area of the nature strip".

13 (d) *Identification of appropriate construction techniques to facilitate the retention of such vegetation, such as pier and beam footings*

Pier and beam footing are not required to re-surface a car park. As per the supplied TPMP, Trees 11–15 are subject to generic tree protection measures.

Regards

Justin Herbert
