Dear Helen

As requested by Falls Creek Alpine Resort please find attached retaining wall detail for reinstatement of the Slalom Street retaining wall following removal of the access stairs to Rocky Valley Ski Club.

As requested, the retaining wall detail is generally in accordance with the typical retaining walls adopted by FCAR throughout the Falls Creek village. We anticipate further clarification may be sought from FCAR to confirm finishing details of facing rockwork.

Existing stairs, footings & returns on existing retaining walls are to be demolished as part of the works and new retaining wall footings to be founded on undisturbed natural ground.

Where possible and/or present, existing drainage behind retaining walls should be connected.

Should you wish to discuss any of the above or require any further information do not hesitate in contacting us.

Kind regards,

Michael Dayment  
Engineer
