Manager – Planning
Glenelg Shire Council
Delivery via email:

Dear Sir/Madam

RE: Planning application – Over-dimensional haulage route – native vegetation removal

Energy Forms represents Willatook Wind Farm Pty Ltd who are the proponent for a planning application for a wind farm proposed within the Moyne Shire Council. A planning application for the Willatook Wind Farm has been lodged with DELWP Renewables – Development Approvals and Design Team and is also the subject of Environmental Effects enquiry.

The attached planning application is for the removal of native vegetation at some roadside locations in the Glenelg Shire on the haulage route to the wind farm project. We are required to submit this application to Council as the responsible authority.

As the wind farm project is the subject of multiple approval processes under different Act's we will be requesting that the Minister for Planning call in this and the other planning application using his powers under Section 97 of the *Planning and Environment Act 1987*. We will be requesting that this application also be called in so that the project can be considered in its entirety through an Advisory Committee process.

We would be pleased to discuss any aspects of this application with you. Please contact [REDACTED] on [REDACTED] if you wish to discuss.

Regards

Energy Forms
