NOTE:
BUILDINGS TO BE CONSTRUCTED TO A BUSHFIRE ATTACK LEVEL OF
BAL 40 IN ACCORDANCE WITH THE RELEVANT SECTIONS TO AS3959
- 2018 UNLESS OTHERWISE AGREED IN WRITING BY THE CFA.

* INDICATES MINIMUM DISTANCE. SUBJECT TO FINAL DESIGN AND
ON GROUND CONDITIONS.

The Cabins are designed to perch lightly on the steep
contours of the natural landscape, providing a finer-
grained complement to the existing and approved White
Horse Village Chalets.

The cabins are sited within the sweeping curves of the
private road, in close proximity to Bourke Street ski run,
and take advantage of the steep terrain as a series of
individual pavilions linked by lightweight walkways.

The predominately prefabricated cabins are contemporary
in appearance with angular forms that reinterpret a
familiar alpine characteristic - steep pitched roofs and
articulated metal-clad profiles, hovering over a lightweight
steel framework that lightly touches the ground. The siting
of the cabins has been considered to minimise impact on
the native vegetation and species habitat, whilst taking
advantage of the stunning views towards the distant valley
and nearby mountains to the south. The pitched roof
forms follow the contours of the site, further reducing the
visual impact to the public spaces.

Sufficient parking is provided from the private road, with
direct access to the cabins via the elevated walkway links.
